

BUILD OUR FOUNDATIONS & CARE PATHWAY

Steps to take to strengthen Bermuda's healthcare system in Year One.

1

DEVELOP AND PILOT INTEGRATED ESSENTIAL CARE PATHWAY:

for essential care as an exemplar to establishing universal health coverage (UHC) and delivering better value.

2

INITIATE NEW WORKING GROUPS:

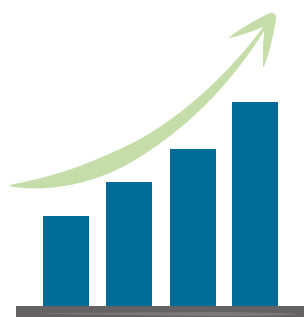

including patients, payors and professionals, to build pan-system structure for stewardship and collaboration.

3

AGREE OUR STARTING POINTS:

by updating national health accounts, identifying pan-system value opportunities, the impact of status quo, health needs assessment, and new system measures.

4

ESTABLISH ECONOMIC CASE:

for healthcare strengthening and UHC to support the wider economic case in Bermuda.

5

DEVELOP NATIONAL DIGITAL HEALTH STRATEGY:

to align and drive wider opportunities in advance of BHB's electronic record implementation.

6

DEVELOP OPTIONS FOR CONSOLIDATING GOVERNMENT HEALTH FUNDS:

to deliver value with initial financial assessment and impact modelling.
